

TABLEAU VISUALIZATION

Q9. Chart Selection Justification.

Explain why different charts were used for different business questions in this analysis.

Ans.

Different charts were used to answer different business questions effectively:

- Bar Chart was used for Category Performance Analysis because it allows easy comparison of sales across different categories.
- Line Chart was used for Sales Trend Analysis because it clearly shows changes in sales over time and helps identify peak and slow periods.
- Pie Chart was used for Regional Contribution Analysis because it displays each region's share of total sales.
- Scatter Plot was used for Profitability Investigation because it helps identify the relationship between sales and profit and highlights low-profit or loss-making orders.
- Running Total Line Chart was used for Business Growth Evaluation because it shows cumulative sales growth over time.
- Bubble Chart was used for Product Prioritization because it enables multi-dimensional analysis using Sales, Profit, and Quantity simultaneously.

Q10. Business Insight Summary

Summarize two key insights from your dashboard and explain how they can help management make better decisions.

Ans.

Insight 1:

The analysis revealed that certain product categories contribute significantly more to total sales than others. Management can focus marketing efforts, inventory planning, and promotional campaigns on these high-performing categories to maximize revenue.

Insight 2:

Regional sales performance varies across different markets. Identifying high-performing and low-performing regions helps management allocate resources effectively, improve strategies in underperforming regions, and expand successful practices in high-growth areas.
